

DRIVE FOR LIVE

**Stay Alive From
Education**

DRIVING IS

- Fun

- A Challenge

- An Adventure

DRIVING IS

The most dangerous
thing you do everyday

Speed

Fatigue

Inattention

Alcohol

Cars are Safe

But **ONLY YOU** can
make **DRIVING SAFER**

Are You at Risk? Take this self-test

Driver's Risk Assessment Questionnaire	
Date:	22-Mar-2006
Please select a gender	
Sex	<input type="checkbox"/> Male <input type="checkbox"/> Female
Age	<input type="text" value="19 or younger"/> Rank <input type="text" value="E1"/>
Driving History (last 3 years)	
<input type="checkbox"/> DUI	
<input type="checkbox"/> At-Fault Accident	
<input type="checkbox"/> Reckless Driving/Speeding over 20 MPH (12 km)	
<input type="checkbox"/> Moving violation/speeding over 10 MPH (6 km)	
<input type="checkbox"/> Driving less than 3 years	
Personal Stress/Family Problems	
<input type="text" value="Not aware of any family problems"/>	
Mitigating Controls	
<input type="checkbox"/> Attend Defensive Driving Course	
<input type="checkbox"/> Attend Additional Driver's Training Course (Including Military Driver's Training)	
<input type="checkbox"/> Counseled on Driving by 1st Line Supervisor (Monthly)	
<input type="checkbox"/> Counseled by Commander or 1SGT (Monthly)	
POV Operations (Leader's Observations) Name: <input type="text"/>	
<input type="checkbox"/> Habitually speeds, fails to use seat belts or motorcycle helmet, drives long distances in short time	
<input type="checkbox"/> Drives a motorcycle	
RISK DETERMINATION	
Initial Risk:	Low Risk
Mitigating Controls:	None Implemented
Residual Risk:	Low Risk

8 Ways to Avoid an Accident

Over 90% of automobile accidents can be avoided. Here are common causes avoid them and you may avoid an accident!

- **Intersection Errors**.....Over 65% of urban accidents occur at intersections. Look around very carefully. Proceed with caution and don't assume anything
- **Inattention**.....Not maintaining close concentration on your own driving, other drivers, pedestrians, and driving conditions.
- **Following too close**..... A generally safe and easy rule is to look at your speed in km and stay at least that many feet behind the vehicle in front.
- **Vehicle Malfunction**..... Have regular checkups, particularly of wiper fluid, brakes , and tires, and replace wiper blades whenever they are worn.
- **Maintain** your vehicle and you may avoid an accident.
- **Dangerous Roads**...Ice, snow, fog, and rain conditions require slower speeds and much greater caution.
- **Unsafe Speeds**... Exceeding speed limits, or driving too fast for traffic conditions. Excessive speed reduces reaction time and greatly increases impact and injuries.
- **Improper Lane Changes**... Before you change, check all mirrors, and signal long before you change. Also, watch for the other vehicles.

These items may seem so today's hectic driving wo simply ignored.

standard to drivers, but, in often overlooked ,forgotten or

Drowsy Driver It is UNSAFE

Don't Forget

It only takes a split second
to die !!
